We Have Control From Start to Finish

From beginning to end we control all aspects of the manufacturing process. From cutting the steel to welding, painting, and assembly.

We can build and customize lifts to meet your customers' needs. With being in control of all these processes, this allows us to offer you better pricing while still delivering an extremely high-quality product by cutting out middlemen in the process.

Key Features

Customizable

The height, platform, and configuration can all be customized to fit your specific needs.

Sharp Aesthetics

This sleek platform lift is designed to blend into any decor. Its minimal frame is also weather protected, making it ideal for outdoor spaces.

Battery Powered

Its innovative engineering allows this product to still be operable in case of a power outage.

Fast Installation

Can be installed in 2-3 days and requires low maintenance with easy servicing.

LED Indicators

Created for quick troubleshooting issues. Each light represents a function on the lift that turns on if an issue is to arise.
